SUMMARY

B.Tech Artificial Intelligence & Machine Learning student with hands-on experience in **software development, backend APIs, databases, and AI/ML solutions**. Proficient in **Python, FastAPI, and Flask**, with a good understanding of **OOP, DSA, and problem-solving**.

TECHNICAL SKILLS

- **Language:** Python and C++
- **Core CS:** Object-Oriented Programming, Data Structures & Algorithms, DBMS, SQL
- **Databases:** MySQL, PostgreSQL
- **AIML:** Pandas, Numpy, Matplotlib, Scikit-learn, Flask
- **Tools:** Git, GitHub, VS Code, Jupyter-notebooks
- **Deployment:** Streamlit, Vercel, Netlify, Render

PROJECTS

FRA Atlas | Digitization & Decision Support Platform

Python | FastAPI | MySQL | OCR | Rule-Based Decision Engine

- Developed a **FastAPI and MySQL-based application** to automate tribal land-claim processing and reduce manual document handling.
- Implemented **OCR-based document processing** to extract relevant information from uploaded documents.
- Built a **rule-based decision engine** to map extracted beneficiary information to suitable government schemes.
- Designed the application as an end-to-end workflow combining **document processing, backend APIs, database operations, and automated decision support**.

AI Smart Irrigation System

Python | Scikit-learn(ML) | Pandas | NumPy | Streamlit

- Built a machine learning application to predict irrigation requirements using **soil, temperature, humidity, pH, and weather-related data**.
- Performed data preprocessing, feature engineering, exploratory analysis, model training, and application deployment.
- Developed a Streamlit interface for **real-time monitoring and zone-based irrigation recommendations**.
- Achieved measurable real-world impact through improved irrigation decisions and approximately **30% water savings**.

FitRep | AI Workout Tracker

Python | AI/ML | Data Processing | Web Application

- Developed an AI-assisted fitness application for **workout tracking, calorie estimation, personalized exercise recommendations, and user progress analysis**.
 - Integrated data processing and intelligent recommendations into an application-oriented workflow.
 - Focused on building an end-to-end solution that combines **user input, data analysis, and personalized outputs**.
-

EXPERIENCE

AI & Green Skills Intern | Edunet Foundation, AICTE & Shell

(July 2025 – August 2025)

- Developed an **AI-powered smart irrigation system** using Python, IoT sensor data, machine learning, and Streamlit for real-time irrigation monitoring and decision support.

EDUCATION

Shri Ram Institute of Technology, Jabalpur |

CGPA: 8.65

B.Tech in Computer Science (Artificial Intelligence & Machine Learning) | 2023–2027

Central Academy Higher Secondary School, Shahdol |

91.8%

Senior Secondary (12th), PCM | 2022–2023

Spring Dales Higher Secondary School, Shahdol |

81.6%

Secondary (10th) | 2021–2022

ACHIEVEMENTS

- NexGen Hack Ghaziabad 2025 | Finalist**
Earned a place among the **Top 30 teams** from **400+ participating teams**.
- VOID Hacks 7.0 | Finalist**
Reached the **Top 15** after competing against **250+ teams**.
